

Ranch Expense Tracker

Web App Installation Guide

<https://redpanda-17.github.io/ranch-expense-tracker/>

Use the same device, browser, and browser profile each time. Expense data is stored locally in that browser. Do not use Private or Incognito mode.

Windows - Microsoft Edge

1. Open Microsoft Edge and go to the Ranch Expense Tracker website.
2. Select the three-dot menu in the upper-right corner.
3. Select Apps or More tools, then select Install this site as an app.
4. Select Install.
5. Pin the app to Start, the taskbar, or the desktop if those options appear.

Windows, Mac, Linux, or Chromebook - Google Chrome

1. Open Google Chrome and go to the Ranch Expense Tracker website.
2. Select the three-dot menu.
3. Select Cast, save, and share, then Install page as app.
4. If an Install icon appears in the address bar, you can select that instead.
5. Follow the prompts to finish installation.

Confirm the installation

- Open the Ranch Expense Tracker icon.
- Confirm the footer shows Version 1.4.0.
- Open Settings and enter your name, department, and report recipient.

iPhone - Safari

1. Open Safari and go to the Ranch Expense Tracker website.
2. Tap the Share button.
3. Scroll down and tap Add to Home Screen.
4. Turn on Open as Web App if that option appears.
5. Tap Add.

iPad - Safari

1. Open Safari and go to the website.
2. Tap Share.
3. Tap Add to Home Screen.
4. Turn on Open as Web App if shown.
5. Tap Add.

Android phone or tablet - Chrome

1. Open Chrome and go to the website.
2. Tap the three-dot menu.
3. Tap Install app or Add to Home screen.
4. Follow the prompts.

Mobile reminders

- Open the installed icon instead of switching between different browsers.
- Use Share PDF or Share CSV when the phone can pass the file directly to Outlook or another app.
- Download a backup regularly and store it securely.

Mac - Safari

1. Open Safari and go to the website.
2. Choose File, then Add to Dock.
3. Confirm the name and select Add.
4. Open the new app from the Dock or Applications.

If Install is not available

- Confirm you opened the website in the browser listed for your device.
- Refresh the page and check the browser menu again.
- Company browser policies may block web app installation. Contact IT if the option is missing on a managed device.
- You can still bookmark the website and use it in the browser.

If an old version appears

1. Close the installed app.
2. Open the website in the original browser.
3. Refresh the page. On Windows, Ctrl + Shift + R performs a hard refresh.
4. Confirm the footer shows Version 1.4.0, then reopen the installed app.

Before removing the app

Download a current backup first. During removal, a browser may offer to delete the app's browsing data. Deleting site data can remove locally stored expenses, reports, and receipts.

Need help?

Take a screenshot of the device, browser, and step where the issue occurs. Include the version shown in the app footer.
